

SafetyData Sheet

Sand and Gravel

Section 1: Product and Company Identification

Supplemental Information

Respirable Crystalline Silica (RCS) may cause cancer. Sand and Gravel is a naturally occurring mineral complex that contains varying quantities of quartz (crystalline silica). In its natural bulk state, Sand and Gravel is not a known health hazard. Sand and Gravel may be

Section 6: Accidental Release Measures

Personal precautions and emergency procedures	Wear appropriate protective equipment and clothing during clean up of material that contains or may liberate Sand and Gravel dust
Materials and methods for containment and clean up	Spilled material, where dust is generated, may overexpose clean up personnel to respirable crystalline silica containing dust. Do not dry sweep or use compressed air for clean up. Wetting of

Section10: Chemical Stability and Reactivity Information
--

Reactivity	The product is stable and non reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.

Section11: Toxicity
